Invalid Input: 6

The screenshot shows the same web browser window as the previous one. The modal dialog box displays the same warning message: "127.0.0.1:5500 says Warning! Rating must be between 0 and 5. Setting to default 5". In the background, the "Star rating (between 0 and 5):" input field now contains the value "6". The "Name:" field still contains "chamod". The "Submit a Ice Cream Rating" button remains visible. The "Ratings list" box at the bottom has been updated to include a new entry: "[7/4/2026 12:51:01 PM] hirusha gave a rating of ★★★★★", while the other two entries remain the same.
