

Task 7.2C

Valid Input

Screen-shot of the web page showing the output for 5 added valid ratings (total of 6 names/rating in list)

World of Ice Cream

Provide your rating on your recent Ice Cream experience

Javascript Loops and Functions

A web pages can be a great way of getting feedback from users. Here, we are asking the user for their name and a rating on a recent *Ice Cream tasting experience* they have had. After inputting their name, the use gives how many *stars* out of **5** they would like to give. This is then recorded and added to a list of previous results.

NOTE: The use should only be able to input a number between 0 and 5, with an error being displayed if it is outside these bounds.

Input Fields

Name:

Star rating (between 0 and 5):

[Submit a Ice Cream Rating](#)

Ratings list last updated on 7/4/2026 at 12:46:47 PM:
