

SIT 218/738: Secure coding

Pass task 2.2P: LLM based threat modelling

Complete the steps provided in “Ontrack Task2.2P Start Activity” on CloudDeakin before completing this task.

Submission Requirements:

Provide screenshots of each step of the activity (“Ontrack Task2.2P Start Activity”) and a detailed explanation of what you did at each step.

Using the analysis received **Ontrack Task2.2P Start Activity**, compare it with the threat model you developed in Task 2.1P. Prepare a comparison table highlighting the differences between the threats identified in the two models, along with their corresponding mitigation techniques. Discuss the key differences, including any threats or mitigations that were identified in one model but not the other.

Add all of the above in your Task submission report.

Submission Due

The due for each task has been stated via its OnTrack task information dashboard.
