

Task 4.1P

After writing all of the internal css/styles as requested, everything looked exactly identical to the image provided in the task sheet except the footer section. Below is the screenshot of my current footer.

And below is an image of the footer from the task sheet.

There's padding in the y axis. In tailwind, I would have done something like py-4. However, since we are using vanilla CSS, I added this section to the footer.

```
padding-top: 0.1em;  
padding-bottom: 0.1em;
```

And now, it works exactly as intended.
