

Task 7.1P

Before Button Click

World of Ice Cream

The top 10 favourite Ice Creams

Jumpstart Javascript Task

Javascript is an important part of modern web development. In this example it is used to dynamically create content and insert it into the web pages' DOM (Document Object Model). Here, the content created and displayed is a list of the Top 10 Ice Cream flavours (in the US) as found here <https://www.delish.com/food/g45129506/most-popular-ice-cream-flavors-america/>.

Here are the **Top 10 Ice Cream Flavours**:

List is empty

Use the button below to call the javascript function that creates the *Top-10 Ice Cream List* and displays it above.
